

Lab 2: Agile Backlog Creation and Sprint Simulation in Jira

Name: E Bhuvan

SRN: PES1UG24CS568

Project Name: Carpool-Splitter (CS)

Methodology: Agile / Scrum

1. Jira Backlog with Epics and User Stories

The screenshot shows the Jira interface for the 'Carpool-Splitter' project. The left sidebar contains navigation options like 'For you', 'Recent', 'Starred', 'Apps', 'Plans', 'Spaces', 'Starred', 'Recent', 'Recent', 'Recent', 'Recent', 'Recommended', 'Filters', 'Dashboards', 'Teams', 'Goals', 'Projects', and 'Customize sidebar'. The main content area displays the 'CS board' with tabs for 'Summary', 'Timeline', 'Active sprints', 'Backlog', 'Calendar', 'List', 'Forms', 'Development', and 'Docs'. The 'Backlog' tab is selected, showing a search bar, version, epic, and quick filters. The 'Epic' section shows 'No epic' and 'Ride Posting Matching' with a key of 'CS-1', 3 work items, and 0 completed. The 'CS Sprint 1' section shows 'Add dates' and '0 work items'. The 'Backlog' section shows '3 work items' and a 'Create sprint' button. The backlog items are: 'CS-2 Post a Ride', 'CS-3 Edit or Cancel a Posted Ride', and 'CS-4 Filter Ride Search Results'. Each item has a 'Ride Posti...' status and a 'To Do' priority.

2. Story Point Assignments and Prioritization

The screenshot shows the Jira interface for the 'Carpool-Splitter' project, similar to the first screenshot but with story point assignments. The 'Epic' section shows 'No epic' and 'Ride Posting Matching' with a key of 'CS-1', 3 work items, and 0 completed. The 'CS Sprint 1' section shows 'Add dates' and '0 work items'. The 'Backlog' section shows '3 work items' and a 'Create sprint' button. The backlog items are: 'CS-2 Post a Ride', 'CS-3 Edit or Cancel a Posted Ride', and 'CS-4 Filter Ride Search Results'. Each item has a 'Ride Posti...' status and a 'To Do' priority. The story points are assigned: 15 for CS-2, 5 for CS-3, and 7 for CS-4.

3. Sprint Board (Active Sprint View)

This screenshot shows the Jira interface for the 'CS board' in the 'Carpool-Splitter' space. The view is set to 'Backlog'. On the left sidebar, the 'CS board' is selected under the 'Recent' section. The main panel displays the 'CS Sprint 1' with 3 work items. The 'Backlog' section is empty. The bottom bar shows 3 selected items and various action buttons.

Spaces / Carpool-Splitter
CS board

Summary | Timeline | Active sprints | **Backlog** | Calendar | List | Forms | Development | Docs

Search backlog | Version | Epic | Quick filters

Epic | No epic

CS Sprint 1 | Add dates | (3 work items) | 27 | 0 | 0 | Start sprint

Item	Key	Estimate	Status	Assignee
CS-3	Edit or Cancel a Posted Ride	5	To Do	[User]
CS-2	Post a Ride	15	To Do	[User]
CS-4	Filter Ride Search Results	7	To Do	[User]

Backlog (0 work items) | 0 | 0 | 0 | Create sprint

Your backlog is empty.

3 work items | Estimate: 27

3 selected | Select all | Edit fields | Change status | Merge | Watch options | Delete

This screenshot shows the Jira interface for the 'CS board' in the 'Carpool-Splitter' space. The view is set to 'Active sprints'. The main panel displays the 'CS Sprint 1' with 3 work items. The 'TO DO' column contains 3 items, 'IN PROGRESS' is empty, and 'DONE' is empty. The bottom bar shows 'Complete sprint' and 'Group: Story' buttons.

Summary | Timeline | **Active sprints** | Backlog | Calendar | List | Forms | Development | Docs

Search board | Version | Epic | Quick filters

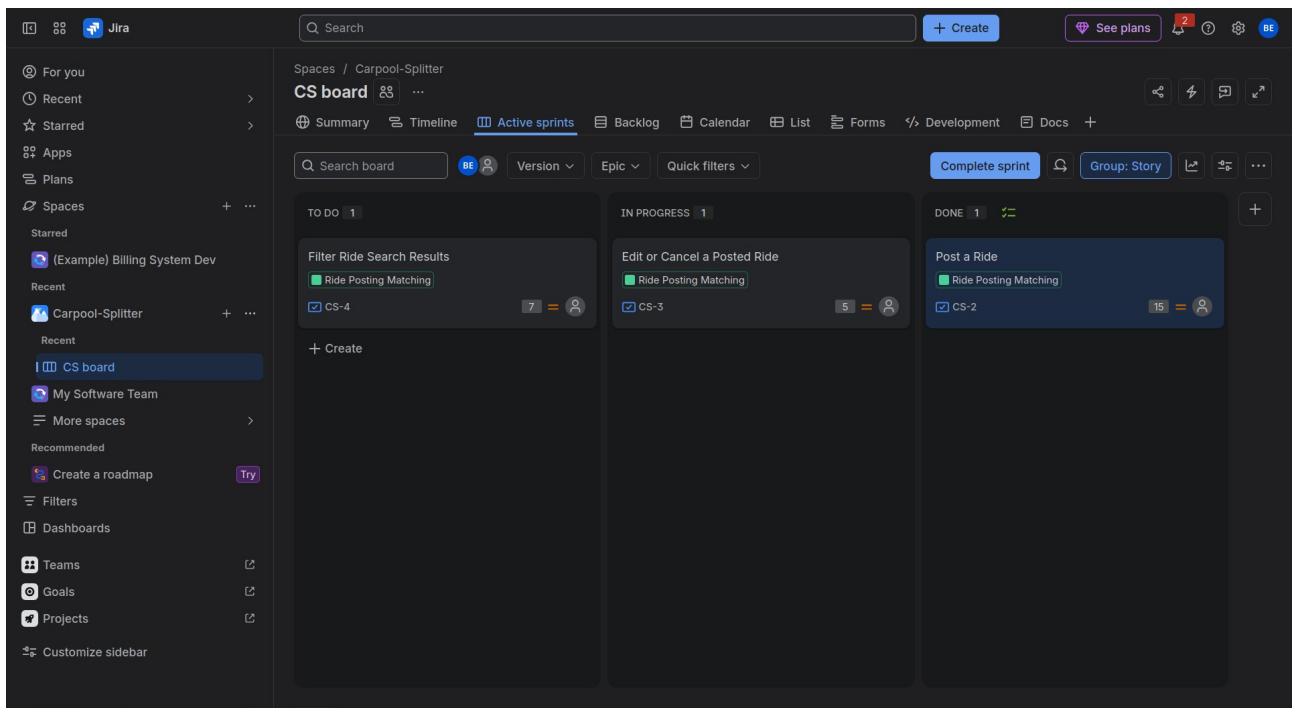

Complete sprint | Group: Story

TO DO 3

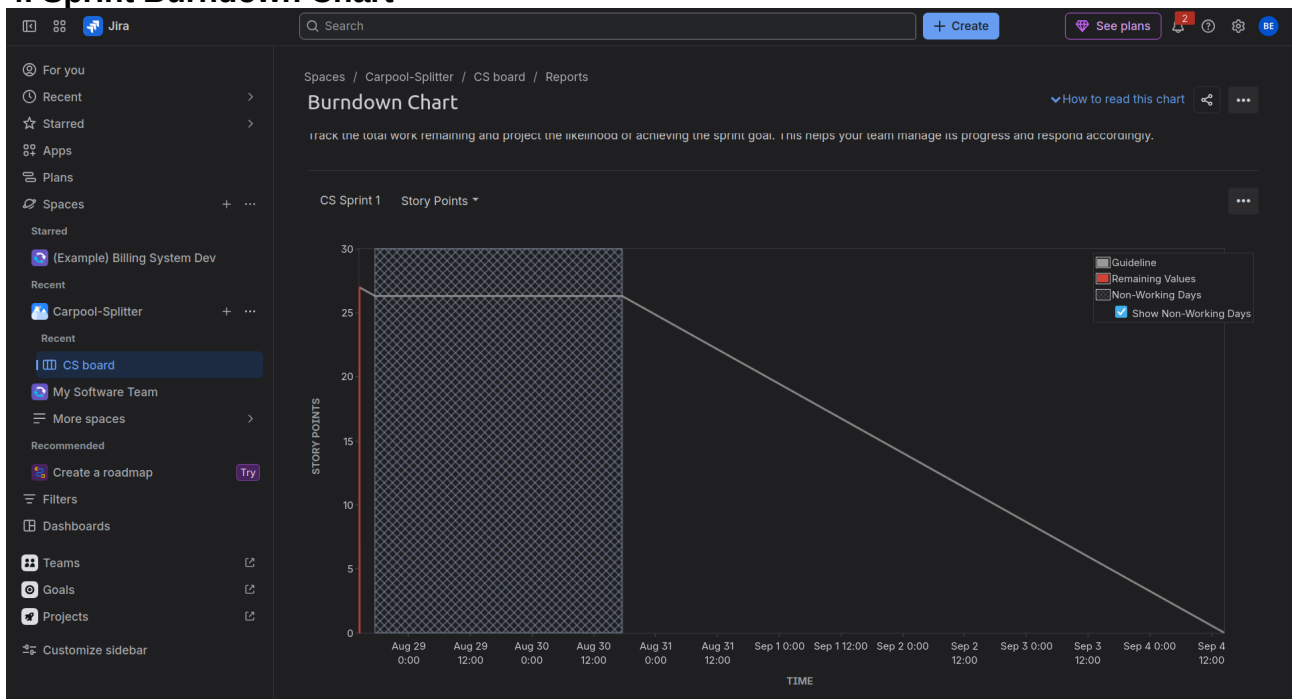

Item	Key	Estimate	Status	Assignee
Post a Ride	CS-2	15	To Do	[User]
Edit or Cancel a Posted Ride	CS-3	5	To Do	[User]
Filter Ride Search Results	CS-4	7	To Do	[User]

IN PROGRESS

DONE 0

4. Sprint Burndown Chart

Questions:

1. Did your estimations reflect the actual effort?

Roughly yes. "Post a ride" and "search rides" (5 pts each) matched their moderate complexity, while "edit/cancel a ride" felt slightly overestimated once done it largely reuses the post-ride logic.

2. Was your backlog well-prioritized?

Yes search and post were rightly High/Medium since they're core to the flow. Edit/cancel was appropriately lower priority as a supporting feature.

3. How did your simulated sprint align with your plan?

It aligned well. All three stories fit into Sprint 1 without needing to be split or rescope, since the epic was small and self-contained.

4. What insights did the burndown chart give?

The line dropped steadily rather than all at once at the end, indicating the three stories were reasonably sized and progressed incrementally rather than being dumped as "Done" in a rush.
